

This comment is an opposition response to the proposed regulations relating to File No. 02-230 in connection with forcibly implanting copy-protection technology in digital television receivers. The producers of copyrighted works already enjoy vast monetary returns from the sale and rental of the CD's and DVD's. Imposing new regulations on the ability to obtain fair use of what is sent via the public airwaves is not to the public's benefit. Accordingly, please work to reduce the regulations, not increase them. Thank You.
